

**JSSATE-STEP &
Department of CSE (Artificial Intelligence & Machine Learning)**

To provide awareness for all AIML students about Entrepreneurship and Startup ideas in the field of Artificial Intelligence technologies.

The technical talk on Assistive Devices by using AI was organised by Department of CSE(AIML) and STEP-JSSATEB on 15th March 2023. The seminar was conducted from 11.30 am to 01.00pm at seminar hall 1 for First Year AI/ML Branch Students. The Resource Person was Mr. Thiyam Akuvan, Founder, Akumen Artificial intelligence Pvt., Ltd. Around 85 students participated in the programme.

Akumen is a technology company that focuses on the intersection of artificial intelligence and social impact. The company uses machine learning, computer vision, and natural language processing to build solutions that can solve complex social problems. Akumen has developed a range of AI-powered solutions that can be applied to various social issues and are using AI as a tool to address real-world issues. Their solutions are practical, and scalable, and have the potential to make a real difference in people's lives. They have partnered with several non-profit organizations and social enterprises to develop solutions that can improve people's lives.

Akumen's commitment to social impact is not limited to its partnerships. The company is making devices to help visually impaired persons. The company solutions are practical, and scalable, and have the potential to make a real difference in people's lives.

The students got awareness on Entrepreneurship, Startup ideas and exposure on Artificial Intelligence and how assisted devices using Artificial Intelligence have scope and are capturing today's market and also have a Social impact.
